SUMMARY

- Computer Science student skilled in MERN stack development with 250+ LeetCode problems solved, specializing in building scalable full-stack applications and strong problem-solving using Data Structures and Algorithms.

EDUCATION

VIT Bhopal University — **Sep-2023 – May-2027**
*B.Tech Computer Science - **CGPA - 8.42*** — *Bhopal, India*

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Operating Systems
- Network Security
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOP)
- Artificial Intelligence
- Web Development
- Machine Learning
- AWS Cloud

PROJECTS

Event Booking Platform | MongoDB, Express.js, React.js, Node.js, JWT, REST API — **2026**

- Engineered a full-stack event booking platform with role-based access control, enabling users to browse, book, and manage event tickets, while allowing admins to independently manage events, bookings, and user activity.
- Designed and secured RESTful APIs using Node.js, Express.js, and MongoDB, implementing JWT-based authentication, bcrypt password hashing, and email OTP verification for secure account activation and booking confirmation.
- Developed a robust booking system with atomic seat-availability checks to prevent overbooking, along with an admin analytics dashboard for monitoring bookings, pending requests, and revenue, and integrated automated email notifications using Nodemailer.

Face Detection and Blurring System | Python, OpenCV, NumPy — **2025**

- Built a real-time face detection and blurring system using OpenCV, automatically identifying faces through a live webcam feed and applying blur to protect identity.
- Implemented efficient face detection and Gaussian blurring logic in Python, achieving lightweight, real-time performance suitable for continuous webcam processing.
- Designed a simple, modular codebase to support future upgrades such as deep learning-based detection models (DNN, YOLO) and video/image file input.

Algorithm Visualizer | HTML, CSS, JavaScript, DSA — **2024**

- Built an interactive tool to visualize sorting algorithms like Bubble Sort, Selection Sort, and Quick Sort.
- Enhanced understanding of algorithm behavior using animations and step-by-step execution.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C++

Frontend Development: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend Development: Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, REST APIs

CERTIFICATIONS

- Applied Machine Learning in Python - Coursera — 2026
- Google IT Support Certificate - Google — 2025
- Data Structures and Algorithms - Apna College — 2024
